# VALIDATED MAXIMO IN THE CLOUD: OPTIMIZING ASSET PERFORMANCE WITH MAXIMO EAM

Validated Maximo in the Cloud is the first cloud-based IBM Maximo EAM solution for the Life Sciences market. This innovative EAM systems solution drives improved compliance management and increased reliability for clients in the pharmaceutical, medical device and biotechnology industries.

Developed by GenesisSolutions and Projotech with over 40 years of combined expertise working in Maximo environments, the new cloud-based solution is the first Maximo as a Service (MaaS) product available to help Life Sciences companies validate their enterprise asset management (EAM) systems and comply with the latest FDA regulatory requirements. Validated Maximo in the Cloud enables companies to meet their compliance targets while enjoying the benefits of a cloud environment.

## Validated Maximo in the Cloud EAM Solution

- **Turn Key:** One-stop service for standard Maximo solution components including software, middleware, database, reporting, support, operating system, infrastructure, system monitoring, integrations and mobility
- **Time to Value:** Proprietary tools that make deployment quick, reliable and consistent
- **Focus on Core Business:** A reliable, safe and secure solution available via the cloud frees up resources to concentrate on the core business

---

“A secure GxP qualified Maximo EAM environment in the cloud is a natural extension of the Maximo as a Service solution that Projotech has provided to industries for 20 years.”

– Mary Speed, VP of Product Development, Projotech

---

# VALIDATED MAXIMO IN THE CLOUD

## Our Approach

Validated Maximo in the Cloud users will benefit from increased security, scalability, accessibility and performance. Benefits include greater focus on business data and reliability through:

- GxP compliant cloud-based Maximo® as a Service (MaaS) solution ready for client validation
- Automation following good manufacturing practices for Life Sciences
- Variability removed from routine complex system management activities
- Certified Maximo experts trained in cGMP protocols
- Four client dedicated environments
- Reliable and secure cloud solution
- Established change management practices
- ISO 27001:2013 certified
- Backups and disaster recovery
- Continuously upgraded solution

---

“Validation testing and achieving regulatory compliance are two major needs of the Life Sciences EAM system marketplace. We are proud to be first to the market with an innovative solution to drive compliance management and increase reliability.”

- Peyton Griggers, President at GenesisSolutions

---

## About GenesisSolutions

GenesisSolutions is the Asset Performance Optimization service line of ABS Group, providing data-driven risk and reliability solutions to clients worldwide that support operational/business performance and compliance. For over a decade, GenesisSolutions has been a market leader in providing reliability engineering, asset maintenance and asset management expertise. Today, we are one of the largest, most capable global EAM service providers, and our extensive team of EAM professionals has created solutions for industrial customers throughout the world. GenesisSolutions is a Gold IBM Business Partner, Maximo Asset Management solution reseller, and authorized support provider.

## About Projetech

Projetech ([www.projetech.com](http://www.projetech.com)) is a Gold IBM Business Partner offering IBM Maximo, the global standard in software for Enterprise Asset Management and maintenance, and the leading provider of Maximo as a Service (MaaS). Projetech's software as a service (SaaS) solution provides customers with a secure, dedicated and supported Maximo application via the Cloud.
